ELIJAH HUDDLEY

WEB DEVELOPER

MY PROFILE

Working as a frontend developer, I've had the experience of being able to help with creating great experiences for users. While at Medean, I've had to sharpen my skills and branch out in other areas of development as well, from creating UI for mobile interfaces, to handling build processes and deployment. I'm looking to continue my growth create more grand experience on projects of major importance.

EXPERIENCE

Software Engineer - Frontend Developer

REPUTATION

May 2020 - Sep 2022

I Worked with interconnected teams to upgrade their primary application that was running the deprecated Angular 1, to React, while improving user experience and updating designs. I Work across several code bases to developing new features including the use of Angular.js, Node.js, React.js, and Google APIs

- Identified hotspots in their application and improved the speed of those areas.
- Updated and combined logic to improve integration into the application

Lead Frontend Developer

Medean / Budge

2015 - 2018

Lead Frontend Developer - Medean: Smart Finance Working from the launch of the company to its current state, I've had the opportunity to have an impact on the growth of the product as a developer. Using react native, I've been able to develop UI from the ground up in a team based environment, develop features and independently and collaborate, and improve the stability of the app

- Launched an Android app using React Native in under 3 weeks while maintaining 100% feature parity with our iOS version
- Implemented cloud based architecture to automate build processes and code maintenance, resulting in a 70% increase in efficiency in developer performance.
- Built custom scripts that communicated with back-end systems to provide visibility into Medean customer engagement and usage through Mixpanel and other analytic SDKs.
- Built custom D3 graphs that visualize user financial data to improve rendering performance
- Implement API requests in node backend services to act on data from users
